

# Science of Reading Leader Implementation Cohort

## Unlock Life's Potential for Every Child!

Knowledge of the [Science of Reading](#) has increased over the last two years in the wake of staggering COVID learning loss. District and literacy leaders across the country are becoming aware that the most widely used reading curricula, whole language/balanced literacy/typical literacy are based faulty science. Not only are these programs and practices ineffective, they're detrimental. Research estimates that **95%** of children could learn to read if we implement [structured literacy](#): diagnostic, systematic, and explicit instruction makes reading accessible for all. [Cox Campus](#) has designed a [yearlong leadership cohort](#) to build your team's knowledge of structured literacy and its implementation, including systems changes to your literacy infrastructure. This opportunity is made available to you at no cost, on behalf of our generous funders, because we believe in [literacy and justice for all](#).
